# Your Decor Options

## **Classic:** Pages 12 - 15

The classic design originated from the European culture. The Greek and the Roman are the main inspirations of the classic design. Very elegant and ornate, the classic design never goes out of style!

## **Geometric:** Pages 16 - 23

A geometric pattern is linear, consisting of geometric figures, such as triangles, rectangles, circles and squares. Geometric patterns are found in many places, including art and architecture, and they tend to be symmetrical. This creates a very clean, simple and sophisticated look.

## **Contemporary:** Pages 24 - 30

Contemporary design is rooted in the moment as in this moment, the here and now. Smooth flowing profiles instead of ornamentation. A strong emphasis on line and form — two essentials of good design — gives contemporary style its energy.

## Water Color

Look for our water color guide below each pattern

### Aqua

With color hues that will remind you of the Caribbean as the sand descends into the blue waters below your feet.

### Light

A light blue that turns your pool into a tropical beach paradise.

### Medium

Temperate medium blue shades transport you to lands and antiquities half a world away.

### Dark

A dark sapphire hue whisks you away to the ocean's deepest waters, inviting you to explore all of the riches below its surface.

**NOTE:** This Water Color Guide is designed to give you an indication of the waters hue based on the interior finish you desire. However, the hue is subjective due to natural sunlight and the surrounding landscape which will affect the water color. Consult your dealer to choose the interior pool finish that will give you the results you are looking for.

*The Interior Finishes™ in this brochure are representational of actual material but are not an exact match. Always ask your dealer to see an actual sample of the Interior Finish™ you choose to make certain it meets your expectation.*

Due to the nature of the material, and various pool angles, it is improbable that floor tiles or pattern repeats will align. This Water Color Guide is designed to give you an indication of the water's hue based on the interior finish you desire. However, the hue is subjective due to natural sunlight and the surrounding landscape which will affect the water color. Consult your dealer to choose the interior pool finish that will give you the results you are looking for.
